

# HIV/Aids programme

Medihelp offers additional benefits to members who receive HIV/Aids treatment through our treatment programme in partnership with LifeSense Disease Management. The HIV/Aids programme covers post-exposure prophylaxis (after accidental exposure), HIV screening tests and antiretroviral therapy. Trained healthcare consultants from LifeSense will assist you with enrolment. You may use a doctor of your choice, who will complete an application form on your behalf to enable LifeSense to provide you with a drug treatment plan. You can be sure of –

- the strictest confidentiality,
- delivery of medicine to the address of your choice, and
- personal service by a dedicated case manager who will counsel and advise you on important matters such as correct medicine use and lifestyle.

## What LifeSense Disease Management offers

- Counselling by professional case managers
- Access to ARV treatment & pathology testing
- Guidance and advice on living with HIV
- Treatment of accidental exposure to HIV

## New members

If you are a newly enrolled member who has been diagnosed with HIV/Aids you have to register on Medihelp's HIV/Aids programme within 21 days of your enrolment by phoning LifeSense. If you fail to do this, we will regard this as the non-disclosure of information, which could affect the continuation of your membership.

## How to avoid co-payments

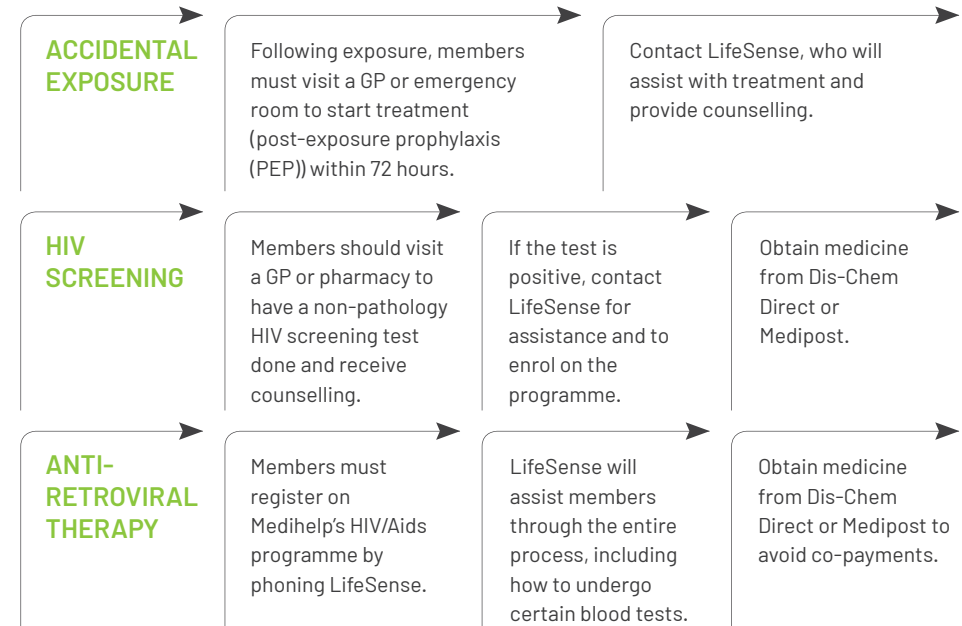

- Register on the HIV/Aids programme.
- Use the designated service provider, LifeSense.
- Obtain medicine from Dis-Chem Direct or Medipost. If you don't use these providers/ services you will be responsible for a 60% co-payment if you are a Prime 1, 2 or 3 Network member or a 20% co-payment if you are on any other option.

## Available benefits

Medihelp pays 100% of the cost for:

- Accidental exposure (PMB cases) – GP consultations/emergency rooms/PEP
- Added insured benefits: HIV screening, testing (non-pathology) and counselling at network pharmacy clinics
- Antiretroviral therapy at LifeSense, Dis-Chem Direct and Medipost
